WEB DEVELOPMENT IMMERSIVE

UNIVERSITY TECHNOLOGY PETRONAS
2011 - 2016
B.A IN PETROLEUM GEOSCIENCES

REFEREES AVAILABLE UPON REQUEST

PERSONAL PROFILE

I am a motivated and passionate front-end developer with a background in geosciences. My previous experience was in the digital space working for a start up agency specialising in ad networks and mobile advertising.

My curiosity and interest towards technology has been my motivation in making the move to development. I love that the endless possibilities of tech means that, when used positively, we can continue to improve our daily lives and being in such a fast paced industry means that I am able to learn and discover new things everyday, which keeps me challenged.

I'm looking forward to working with a great team of developers in which I can continue to learn and grow.
